

**MAINE SCHOOL ADMINISTRATIVE DISTRICT #53  
Burnham – Detroit – Pittsfield**

**SAD #53 School Attendance Policy for Students Infected with Human  
Immunodeficiency Virus**

Policy Statement

Public law in Maine guarantees all children the right to an education. The purpose of this policy is to establish what actions shall be taken in the event that MSAD #53 is made aware that a student attending school is infected with HIV.

MSAD #53 has as its primary goal the provision of quality education in a safe environment for all students.

This policy has been adopted to assure that the rights and safety of all involved parties are preserved.

Policy Elements

1. In general, MSAD #53 shall provide educational opportunities for students infected with HIV just as it does for other students. This shall include attendance in regular class settings. Students infected with HIV shall be entitled to all the rights, privileges, and services provided by Maine law and MSAD #53 policies.
2. In the event that a public health threat is perceived by the student's physician, the Bureau of Health must be notified, and will conduct an evaluation. If the school is notified of a student infected with HIV by the parents/guardians and becomes concerned about the safety of that student, other students, or staff, a similar evaluation may be requested. At any time that MSAD #53 is concerned that a particular student poses a public health threat to others, advice may be requested from the Bureau of Health.
3. In the rare event that the Bureau of Health determines that conditions exist which suggest that a student with Human Immunodeficiency Virus infection is a health threat to the school community, the Bureau of Health shall notify the superintendent and the Bureau of health and/or the superintendent shall remove the student from the usual classroom setting until other arrangements can be made or until the Bureau of Health determines that the risks have abated. The health status of a student temporarily removed from the usual school setting in order to protect the health of the student or others will be re-evaluated at least quarterly by the Bureau of Health and reported to the superintendent.
4. Current Maine law protects the confidentiality of HIV test results with certain statutory exceptions. Test results may not be disclosed to anyone without written consent of parents/guardians. Records containing information about Human Immunodeficiency Virus test results and consent forms relating to test results

shall be kept separated from other school records. Only those persons given written consent by the student's parents/guardians shall have access.

5. With written consent of the parents/guardians, the school shall designate an individual or team to:
  - A. Serve as the liaison between the school, and the student's parents, the student's physician and, if necessary, the Bureau of Health; and/or
  - B. Serve as the coordinator of the medical component of the student's educational experience.

Any team member or individual entrusted with the knowledge of a student infected with HIV must, by law, keep his/her knowledge of that child's status confidential, and access to information shall be limited only to those persons authorized in writing by the student's parents/guardians.

In the event that a school employee should discover through verbal or written conversation that a student is infected with Human Immunodeficiency the staff member will report that information to the superintendent at the earliest possible time. The superintendent will inform the parents of the HIV student and request advice from the Bureau of Health. Confidentiality standards will be upheld.

6. At the parents/guardians' written request, a designated team member, usually the school nurse, will notify the student's parents/guardians and/or the student's physician in the event that infections occur in the school population that may place an immunodeficient student at increased risk as defined by the student's physician or Bureau of Health. The decision whether or not to remove the student from school will be made by the parents/guardians and the student's physician.
7. Because of the inability to identify individuals who may be infected with Human Immunodeficiency Virus or other agents transmissible through blood and other body fluids, MSAD #53 shall follow standard procedures for cleaning and disinfecting all body fluids spills. If there is a need to handle items which are soiled with body fluids or to clean surfaces which are contaminated with body fluids, gloves shall be used in this process. Such contaminated articles shall be cleaned with soap and water and disinfectant. All staff members shall participate in the training on how to deal with body fluids that they may encounter as part of their daily tasks. The procedures for cleaning bodily fluids spills shall be reviewed annually by all school staff members.

MSAD #53 will continually provide educational programs to inform parents/guardians, students and staff regarding AIDS and all other communicable diseases. The superintendent shall be responsible for the consistent procedural implementation of this policy.
